

Conejo Road Sewer Main Extension Project

The City is installing a new sewer main at 450 Conejo Road. Construction is expected to last three to four weeks. Construction hours will be limited to 7:00 A.M. until 5:00 P.M., Monday through Friday.

The project will reroute the sewer line to avoid the Conejo slide area. The new main will be constructed by boring upslope, with some minor trenching. The width of Conejo Road will be temporarily reduced to accommodate the boring pit as shown on the map below (red highlight). No road closures will occur; however, minor traffic delays can be expected. Residents are advised to use detours to avoid the construction area.

For additional information, please contact Bradley Rahrer, Project Engineer, at (805) 560-7531 or visit the [Major Construction Projects](#) map.
